

## Ethical, Social and Environmental Statement

We believe business should always be conducted in a transparent and accountable manner. Our UK production facility is a member of both SEDEX and Fast Forward regulatory authorities. It is regularly audited for continued compliance and has undergone certified audits for ethical, social accountability, labour standard's, and workplace conditions.

It is also committed to continually work with suppliers and support its customers to measure and minimise the impact of both its products and activities on the environment at all times.
